Education

STANFORD GRADUATE SCHOOL OF BUSINESS Stanford, CA
Master of Business Administration Candidate June 2027

UNIVERSITY OF CALIFORNIA, BERKELEY Berkeley, CA
B.S. Electrical Engineering & Computer Science, B.S. Business Administration (GPA: 3.76) May 2021

- Founding Member of M.E.T. (Management, Entrepreneurship, and Technology) program
- Minor in Data Science, M.E.T. Distinction Scholarship Winner
- Head TA for Intro CS course (CS 61A) and Instructor at Prison Education Project

Experience

Google Sunnyvale, CA
MBA Product Management Intern - Google Cloud Applied AI June 2026 - Sept. 2026

- Deployed Google DeepMind voice and video models to multiple Fortune 100 customers in retail, telecom, and services industries through custom agentic solutions and coordination with forward-deployed teams (FDEs)
- Drove adoption of Google's real-time conversational voice model to 40%+ of customer call traffic through enterprise evaluation and developer-experience engagement
- Defined a 0-1 generative Virtual Try-On product that lets e-commerce shoppers try products on in personalized 2D and 3D; wrote core PRDs and secured eng and product greenlight from senior Google Cloud leadership
- Partnered with DeepMind engineers to hillclimb and improve on Google voice and video models via intensive data-driven, loss pattern analyses from auto-evals, human evals, customer A/B testing, and dogfooding
- Developed 3 functional prototypes and 7 executive-level video demos, presenting the product vision and user journeys to Fortune 100 senior leadership

Amazon Seattle, WA
Software Engineer II - AI and Data Apr. 2023 - Sept. 2025

- Launched a 0-1 product for an AI-powered, LLM-enabled data privacy system for data engineers and software developers that allows Amazon to seamlessly adhere to dynamically-changing, global regulations, such as HIPAA (medical-related data), COPPA (child-related data), and 3rd-party Seller Data
- Designed AI agents and MCP servers to create user-friendly, LLM-powered data management systems handling all Amazon.com retail data regarding customers, sellers, clients etc.
- Cross-coordinated with lawyers, product managers, and data engineers in Europe, India, and U.S. to rollout adoption across all 100,000+ Amazon.com datasets
- Accelerated monthly client adoption of services by 300% via incorporating feedback from user research panels and customer interviews during beta and GA (general availability) launches

Software Engineer - AI and Data Aug. 2021 - Mar. 2023

- Spearheaded design and implementation for the data privacy system that identifies and automates privacy enforcement for thousands of petabytes of Amazon.com data
- Generated over $5.3M in annual savings by creating an efficient resource allocation algorithm to intelligently determine & transfer underutilized database resources to teams with short-term high potential & demand
- Received Security Excellence Award due to leading an org-wide initiative for ops reduction/service deprecation

Skills, Projects, and Interests

- Proficient in Programming (Java, Python, Kotlin), Data Processing, Generative AI modeling, Cloud Computing, Machine Learning, LLMs, Agent and MCP Server Creation, Model Evals, Loss Pattern Analysis
- Experienced in Customer Acquisition/Adoption, Product Design, Project/Team Management, Product Roadmapping, Cross-Functional Communication, and Stakeholder Management, Evals & A/B Testing
